DETAILED ACTION

1. Claims 1 – 36 are presented for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 – 2, 5 – 10, 12 – 14, 17 – 22, 24 – 26, 29 – 34 and 36 are rejected under 35

U.S.C. 102(e) as being clearly anticipated by Dorr, US 2002/0016743.

4. As to claims 1, and 17, and related claim 25, Dorr discloses a system and method in a data processing [on-line auctioning] system including a server computer system [on-line auction server], which includes a server clock [server clock is inherent to the server computer], coupled to a client computer system [user computer], which includes a display and a client clock [display device and clock are inherent to the user computer], for generating and displaying, in said client computer system, a local server clock [300, clock] which is synchronized with said server clock [auction server time] utilizing said client clock [user computer's processor time][to place user's computer in sync with official time of the on-line auction server, para 0023 on page 2], said method comprising the steps of:

- a. requesting data [requesting a SEARCH RESULTS] from said server computer system [on-line auction server] to be displayed on said client computer system's display [user computer display];

Art Unit: 2116

b. receiving said data [receiving web pages] from said server computer system [on-line auction server] by said client computer system [user's computer];

c. said client computer system [user's computer] determining a current time [official time] indicated by said server clock [on-line auction server clock]; said client computer system generating a local server clock [300]; thereafter, updating [by comparing and correlating user computer processor time with official auction time obtained from on-line auction server] said local server clock utilizing said client clock; and

d. displaying said data [auction item] and said local server clock [300] together on said display [para 0008, 0018 – 0024 on page 1 – 2, fig.3, 5 – 7].

5. As to claims 2, 14, and 26, Dorr discloses updating said local server clock [300] utilizing said client clock [user computer processor time] further comprises the step of incrementing said local server clock [increase in time is inherent property of clock as time passes] utilizing said client clock [user computer processor time] to count increments [fig. 5].

6. As to claims 5 – 6, 17 – 18, and 29 – 30, Dorr discloses requesting web pages including at least one auction item available from server computer to be displayed on client computer's system display [para 0003 on page 1, fig. 1 – 3].

7. As to claims 7 – 10, 19 – 22, and 31 – 34, Dorr discloses displaying an icon associated with at least one auction item available for sale until particular data and time determined by server clock, and determining amount of time currently remaining, establishing and displaying time-remaining counter with decrementing time remaining counter [0008, 0018-0021, fig. 3, 5 – 7].

Art Unit: 2116

8. As to claims 12, 24, and 36, Dorr discloses closing of window and stopping time-remaining counter in response to closing of window, which is inherent to closing of display window showing data together with bidder time left to stop [710, fig. 7].

Allowable Subject Matter

9. Claims 3 – 4, 15 – 16, and 27 – 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. Claims 11, 23, and 35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
